

I understand public radio censorship is important and much needed sometimes, but eliminating my traffic and weather channels on XM radio is down right communist. There is nothing threatening about traffic and weather. I pay for it and I should get it on demand, as offered. XM has done a wonderful job of being innovative and providing great service to their customers. Please dont let the National Association of Broadcasters ruin a good thing. I urge you to please reject NAB's petition 04-160, and maintain the flexibility of paid radio. Hey, I get traffic and weather on demand through my paid cable service, why cant I get it through paid radio as well?

Thank you,

Douglas Carter
